AMENDMENTS TO THE CLAIMS

Please add or amend the claims to read as follows, and cancel without prejudice or disclaimer to resubmission in a divisional or continuation application claims indicated as cancelled:

- 1-50. (Cancelled)
- 51. (Currently Amended) An in vivo device having a front end and a rear end, said device comprising:

a plurality of optical windows, at least one optical window at the front end and at least one optical window at the rear end, each window covering at least [[an]] a plurality of illumination sources and an imager, said optical windows facing different directions.

- 52. (cancelled)
- 53. (Previously Presented) The device according to claim 51 wherein each window is dome shaped.
- 54. (Previously Presented) The device according to claim 51 comprising a lens positioned behind the optical windows.
- 55. (Previously Presented) The device according to claim 51 comprising a lens positioned between an imager and an optical window.
 - 56. (cancelled)
- 57. (Currently Amended) The device according to claim 51 comprising a transmitter to transmit signals from the imager to a receiver external to a patient's body.
 - 58. (Previously Presented) The device according to claim 57 wherein the transmitter transmits over a single channel.
 - 59. (Previously Presented) The device according to claim 57 wherein the transmitter transmits over multiple channels.
 - 60. (Previously Presented) The device according to claim 51 wherein the device is capsule shaped.
 - 61. (cancelled)
 - 62. (cancelled)

63. (Currently Amended) A method for in vivo imaging of a body lumen, the method comprising the steps of:

illuminating in vivo sites from behind at least two optical windows;

obtaining images of the in vivo sites from each of the at least two optical windows, there being covered by each optical window at least an imager and an a plurality of illumination sources; and

transmitting the images signals from within the to a receiver external to the body lumen.

- 64. (Previously Presented) The method according to claim 63 comprising the step of illuminating the in vivo sites from different directions.
 - 65. (Previously Presented) The method according to claim 63 comprising obtaining images of the in vivo sites from at least two imagers.
 - 66. (Previously Presented) The method according to claim 63 comprising obtaining images from a front and from a rear of an in vivo imaging device.
 - 67. (Previously Presented) The method according to claim 63 comprising transmitting signals over a radio channel.
 - 68-71. (cancelled)
